

# Application Acceleration with Zeus Extensible Traffic Manager

Zeus Extensible Traffic Manager makes your networked and web enabled applications **faster**, more **reliable**, **secure** and **easier to manage**.

By placing ZXTM in front of your networked and web-enabled applications, you can boost the number of transactions your infrastructure can handle, and dramatically increase the speed and responsiveness that your users experience.

BroadBand Testing, an experienced independent test laboratory in Europe, evaluated ZXTM's application acceleration capabilities with extensive tests in a variety of scenarios:

Application Accelerator  
Product of the Year  
and Editor's Choice

Product Breakthrough  
Award: Application-Aware Infrastructure

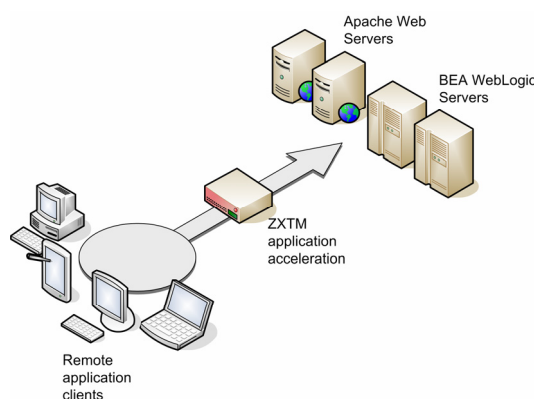

Broadband Testing  
Approved:  
Gold Award

Zeus Technology is renowned for its expertise in high performance application acceleration products. Zeus' products are frequently used by hardware manufacturers such as AMD, Intel, HP, Sun and IBM to get the very most from their servers in the industry-standard SPECweb performance tests.

## ZXTM delivers Application Acceleration by:

- Offloading compute-intensive tasks so that each application can concentrate on its core tasks;
- Accelerating and buffering TCP transactions to achieve local-network speeds, even over a global WAN;
- Minimizing connection processing on the application by optimized HTTP KeepAlive multiplexing;
- Caching frequently-requested content on behalf of the application.

Application Acceleration results in faster, more responsive and more reliable web sites, with significantly better return-on-investment on application hardware and software.

### “ZXTM has dramatically improved our web browsing and booking response times”

*"We have been extremely impressed with the capabilities of ZXTM. It has fulfilled all our requirements to create a scalable, resilient and high-performance e-commerce site"*

Robin Fitton, Head of IT Operations, Virgin Holidays

### 700% improvement in application response times

*"The real challenge was to maximize existing resources, rather than having to continually add new servers."*

*"Zeus is leaps and bounds ahead of its competition in all areas of the game."*

Kent Wright, Systems Administrator, QuantumMail.com

### “It's taken everything we've thrown at it so far”

*"Since ZXTM was deployed, there has been a major improvement to the performance and responsiveness of the site."*

David Turner, Systems Architect, PLAY.COM

### “ZXTM has been rock solid”

*"When it comes to flexibility and speed, ZXTM outperforms any other solution we've looked at."*

Frank Denis, System Administrator, Skyrock.com

### “Really exceeded our expectations”

*"Since implementing the solution we have experienced a much better response time from our applications, especially in the handling of slow end user connections."*

Torsten Sturm, CTO, Hotel.de
